

# FSJ Vision Statement

The vision being offered in the ministry that is; The Fraternity of St. Joseph's Men's Group, is fortitude forged in strength of life lessons learned and now shared by the revered men who lived their faith well, to bring clarity to the challenges that undoubtedly lie ahead for the intentional Catholic journeyman.

The twofold benefits of joining the fraternity are:

1) the opportunity of building up a Band of Brothers, fostering lifelong relationships within a community of likeminded men who commit to shoulder up and help their communities navigate the trials ahead.

2) Access to the "Tools of Reach" resources offered to help those men, and future generations navigate the challenges of reaching salvation, as they are intentionally placed into the hearts and wills of our children in their formative years.

In our humanity, we stand confused and outside of ourselves when we face things on our own. We are not meant to face our journey alone. Not even Jesus faced the journey of His physical life alone. The message we will be sharing in, and handling on, are the life lessons that only wisdom can teach us. Truth is told to us all slowly, and over time. One question we will be discerning will be, when you look back on your life, how will you look back on this moment in time? Fortitude to face the challenge ahead is needed! Do you ever think about what the family that you will be held accountable by God to lead looks like? Knowing that we are created by God to lead his faith-filled family is an awareness that we must become competent to, but before we can intentionally lead, we must first humbly follow. The men who are forming this fraternity are aware that our younger brothers have no one to follow in the public square. We are committed to assist in preparing them for the challenges ahead. Step closer with us and join in the fellowship that will change the world around you. Iron sharpens iron!
